Summary

Full-Stack Software Engineer focused on AI-powered applications, with hands-on experience building production-ready systems using React, Node.js, PostgreSQL, and Python. Experienced in integrating LLMs with domain-specific engines such as KataGo to deliver interactive coaching, analysis, and decision-support features.

Professional Experience

Software Engineer Intern

IMTG

Sydney, Australia

Jan 2026 – Present

- Built an **AI**-powered Go coaching platform combining the KataGo analysis engine with **LLM**-generated explanations, enabling players to understand move quality and strategic mistakes.
- Improved backend reliability by introducing Jest **unit tests** and API validation, reducing regression issues during feature updates.
- Increased deployment consistency by containerising services with **Docker** and supporting automated **CI/CD** pipelines.
- Built end-to-end full-stack features with **React**, **Node.js**, and **PostgreSQL**, supporting game-state management, analysis workflows, and shareable user experiences.

Front-End Developer Intern

JD.com

Remote

Nov 2025 – Jan 2026

- Built internal dashboard interfaces using **React (Next.js)** and **TypeScript**, developing reusable data-driven components for enterprise analytics systems.
- Improved frontend data workflows by building data-driven components with structured **JSON datasets**.
- Enhanced analytics visibility by developing interactive dashboards with **D3.js** and **Chart.js**.
- Improved rendering performance for data-heavy interfaces through optimisation in Agile sprint cycles.
- Increased development efficiency by using Cursor for **AI-assisted** coding, debugging, and UI prototyping.

Projects

Interview Coach

Python, LLM, Node.js, React | [Live Demo](#)

Sydney, Australia

Mar 2026 – Present

- Built an **AI**-powered interview coaching platform to simulate realistic interview practice by generating personalised technical and behavioural questions from resumes and job descriptions.
- Developed a **Python** AI service that evaluates answers using **LLMs** and returns structured feedback including strengths, improvement areas, and scoring.
- Designed a **session history** and summary system that stores interview interactions and generates a final performance summary for candidate review.

Property Management System (RentWeb)

Next.js, Node.js, TypeScript, PostgreSQL

Sydney, Australia

Jun 2025 – Nov 2025

- Built a secure RBAC system for a multi-tenant property platform using **JWT** and custom middleware.
- Developed a real-time work-order module with **Socket.io** for instant status updates and in-app communication.
- Delivered 15+ RESTful APIs for booking and maintenance workflows using **Express** and **Prisma** Transactions.
- Improved query performance for property listings by optimising PostgreSQL indexing and pagination to achieve sub-100ms responses.
- Deployed the platform on **AWS** with EC2, S3, CloudFront, and **GitHub** Actions for CI and automated testing.

Education

The University of New South Wales – Master of IT

Sydney, Australia

2023 – 2025

Skills

Programming Languages: JavaScript (ES6+), TypeScript, Python

Frontend: React, Next.js, Svelte, HTML5, CSS3

Backend & Database: Node.js, Express.js, RESTful APIs, PostgreSQL, Supabase

AI: LLM APIs, Prompt Engineering, AI evaluation pipelines, LLM application development

DevOps: Docker, GitHub Actions, CI/CD

Tools: Git, Jira, AWS EC2, S3, Vercel
